Brewing Industry

A guide to products and services

ENGINEERING YOUR SUCCESS.

Focused on Adding Value to Your Business

Improving quality and control

Supported by innovative products, state-of-the-art technical facilities and a specialized international team, Parker domnick hunter's capability is based on understanding the specific needs of your business and providing a total solution.

Delivering value from brewhouse to bottle

Parker domnick hunter offers a joint approach to beer processing to review and manage your entire process. We incorporate an up-front consultation & assessment to establish your overall goals, as well as a range of after sales packages that ensure the Parker domnick hunter solution is working at maximum efficiency. All aspects that affect your process are taken into account, making small changes that can lead to big results.

Parker domnick hunter Products

Parker offers the broadest range of products in the industry, and our quality control assures that all materials and filters used for contact with foods and beverages comply with current FDA regulations.

Purity that goes beyond Filtration

Developing solutions that support quality in every aspect of your process make us a truly unique supplier who can deliver complete purification of your liquid and gas applications enabling you to have confidence and assurance in the quality of your final product.

Global Support

As a Division of Parker Hannifin Corporation, we have subsidiaries and manufacturing locations worldwide, so we can offer you true global support with local perspective and expertise.

Committed to process improvements

Our goal is to continually improve your productivity, reduce your process costs and ensure the safety of your final product. Parker commits to your goals through:

- Continued investment in research & technology
- Application-driven approach to new products
- Market & geographical experience leading to tailored solutions
- Global network providing technical, service and sales support
- Excellent reputation gained through working with the worlds leading wine producers
- Highly-skilled, experienced and trained employees

Clarification ●

- PEPLYN range of liquid filters
- Polypropylene media
- Effective particulate removal
- Available in large diameters

Sterile Gas & Vent Filtration ●

- TETPOR & BIO-X range of filters
- PTFE media
- Assured biosecurity

Pre-Stabilization ●

- PREPOR range of prefilters
- Polypropylene & glass fiber media
- Clarification & spoilage reduction
- Extend life of membrane filters

Filterability Index (FI) Assessment

Laboratory scale test used to determine the filterability of beer. Provides data that can be used for filter selection and sizing.

Final Stabilization ●

- BEVPOR range of final filters
- PES membrane
- Removal of yeasts & spoilage organisms

Steam ●

- Steam to meet culinary standards
- Protects equipment & downstream filters

Carbon ●

- Extruded activated carbon filter
- Chlorine & odor removal

Filter Integrity Testing

Integrity testing of sterile grade filters is a fundamental requirement of critical process applications ensuring the biological safety, quality and shelf-life of the product that reaches the customer. Parker domnick hunter provides a range of instruments suitable for brewing applications providing a test protocol that fits well into a HACCP framework.

- VALAIRDATA II - Aerosol challenge of sterile air filters
- BEVCHECK PLUS - Pressure decay testing of membrane filters

Chilling

Process cooling is regularly used within the brewery for:

- Temperature regulation during fermentation
- Temperature control for storage & packaging
- Cooling hot wort prior to fermentation

Parker Hiross has more than 30 years experience in the manufacturing of cooling systems and has a wide range of chillers for brewing applications.

Silt Density Index (SDI) Testing

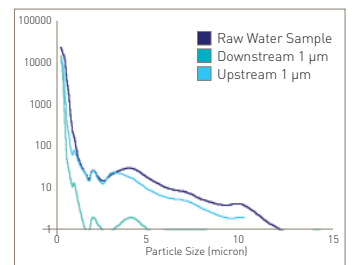

An evaluation of suspended particles and colloids in the water, based on the rate of blockage of a test membrane. Samples are taken over a given period of time to provide an indication of the performance of various treatment stages and the effect on water quality due to seasonal variation.

- Disc trial carried out over 15 minutes
- Multiple samples taken
- Periodic testing to monitor seasonal trends

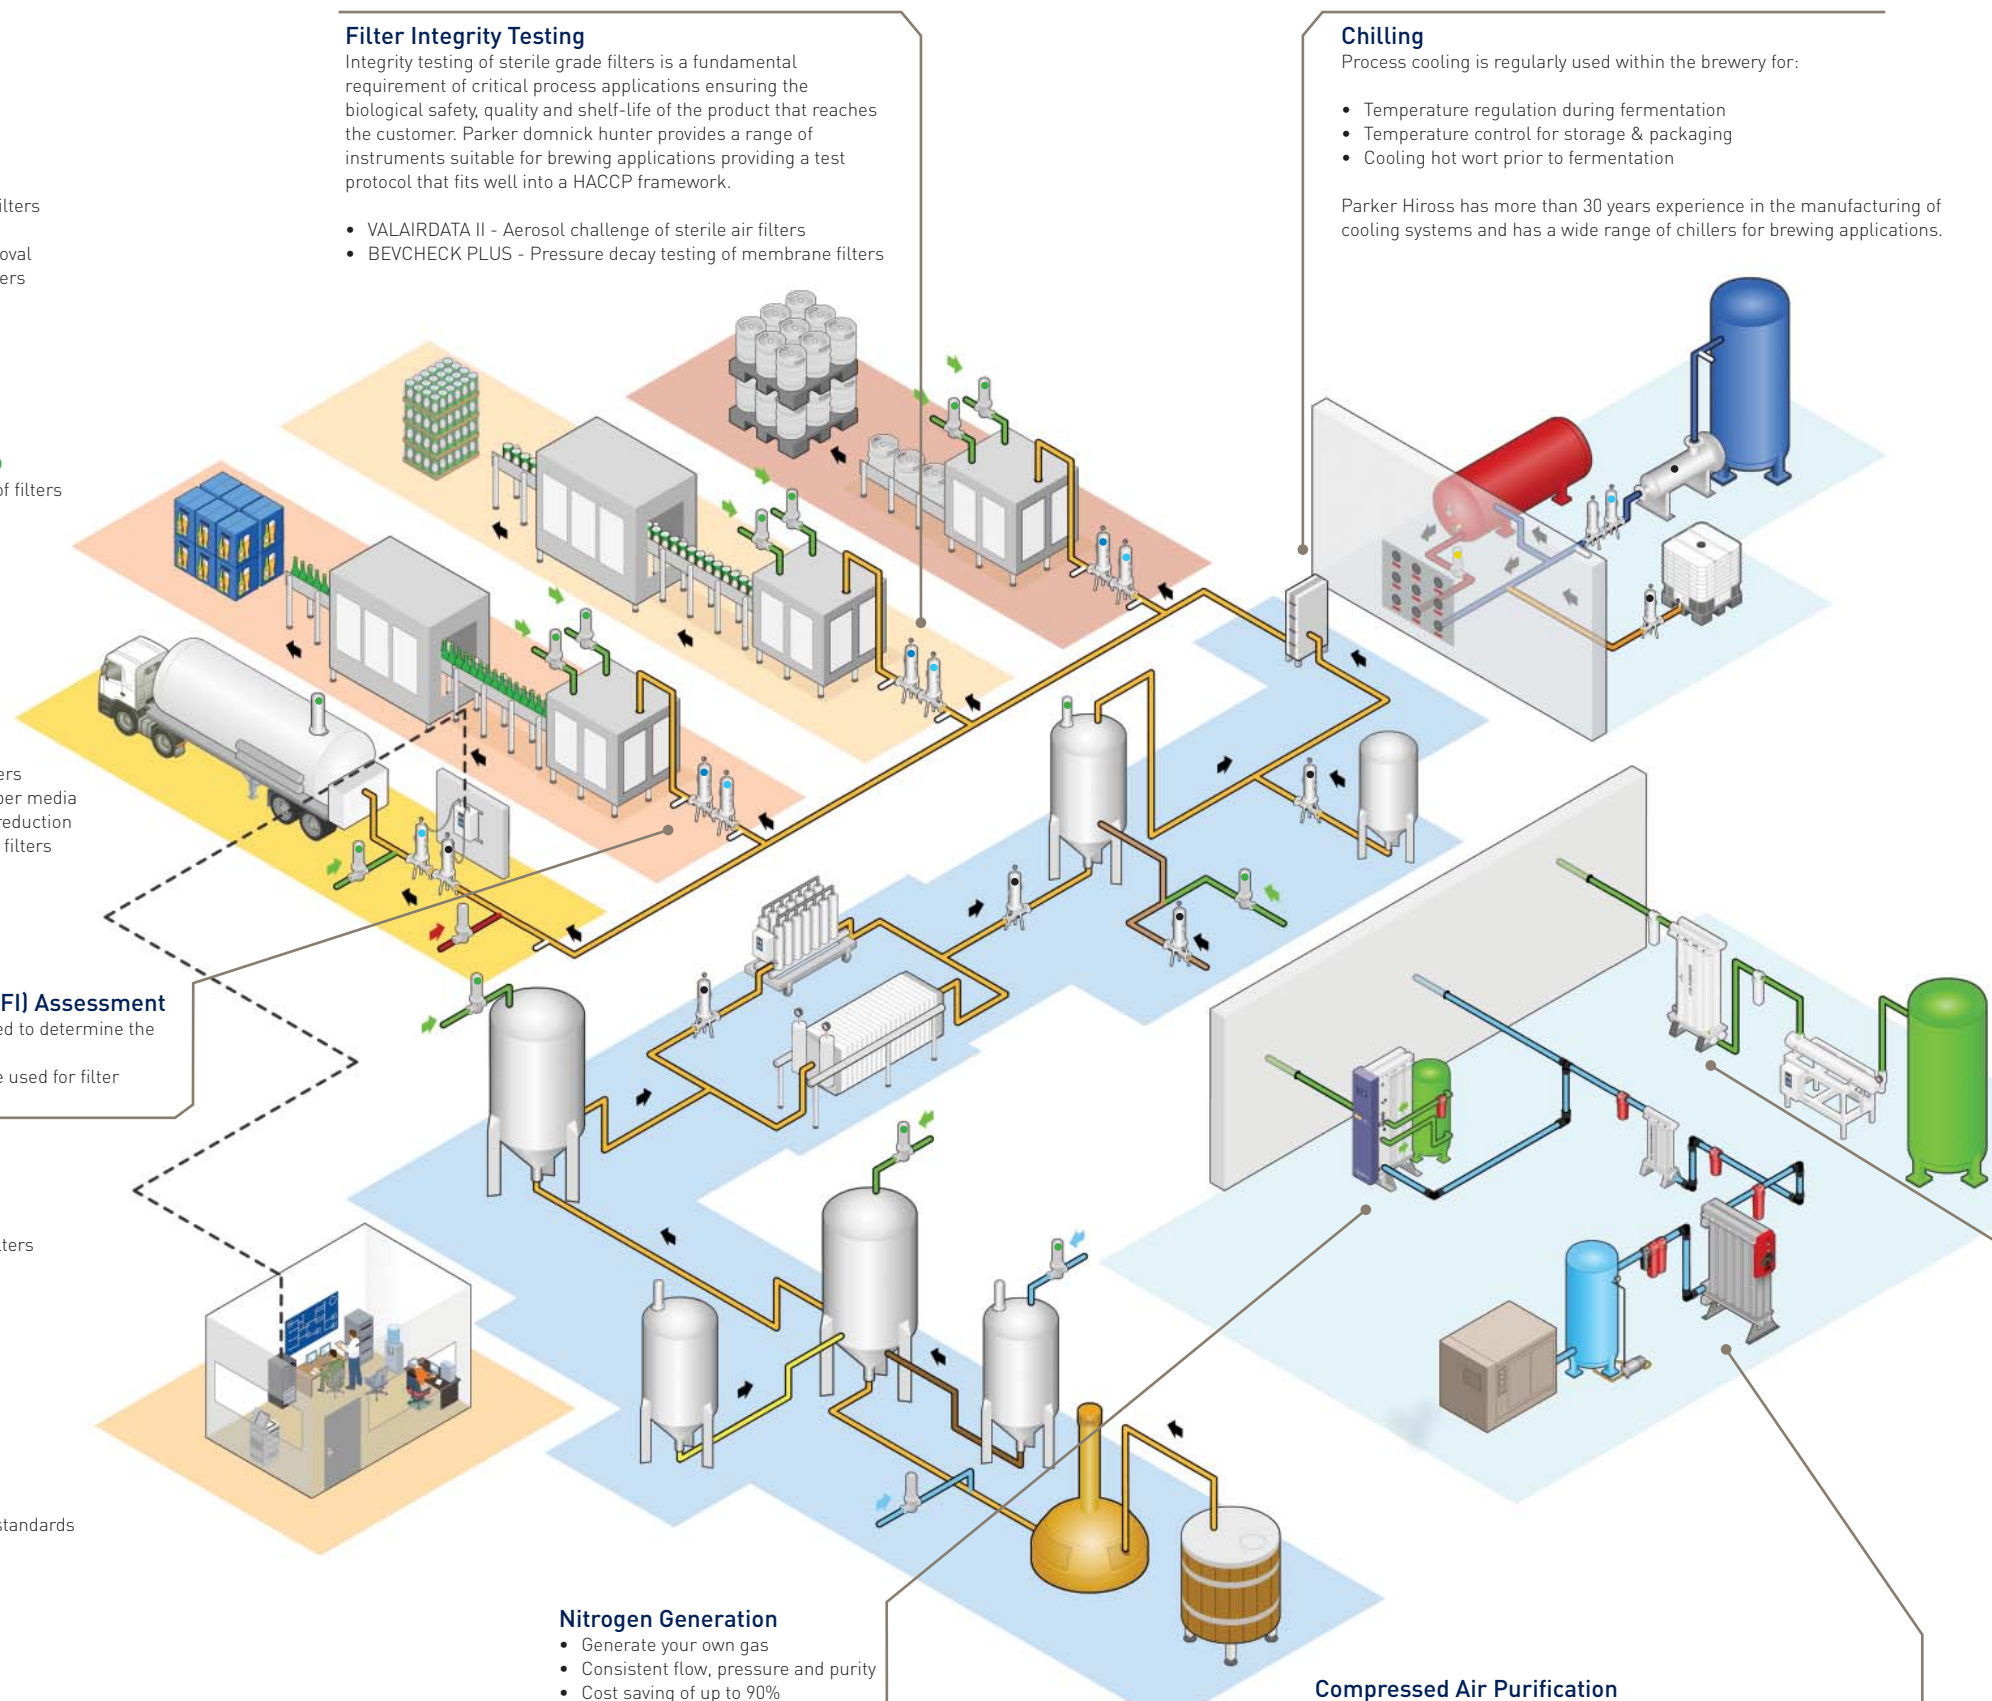

Particle Size Analysis (PSA) Testing

PSA is a measurement of particle size distribution in water samples using a laser particle counter either on-site or in a laboratory environment. PSA can give an indication of the expected workload of a filter system.

- Helps identify the need for more effective prefiltration protecting downstream membranes

Nitrogen Generation

- Generate your own gas
- Consistent flow, pressure and purity
- Cost saving of up to 90%
- Improves safety
- Increases efficiency

- Applications include:
 - Pressure transfer
 - Blanketing
 - Purging
 - Sparging
 - Filling

Compressed Air Purification

Direct and indirect contact between compressed air and beer may lead to oxidation or contamination. BRC / BCAS code of practice for food/beverage grade compressed air protects beer manufacturers and bottlers. Parker domnick hunter as market leaders provide a complete solution that will remove a potential of 10 contaminants from up to 4 different sources.

- Water separators
- Coalescing filters
- Adsorption filters
- Refrigeration dryers
- Dust removal filters

CO₂ Polishing

The PCO₂ system is designed as a quality incident protection unit acting as a point of use vapor 'polisher' and is proven to be effective at removing a wide range of potential CO₂ impurities, such as Benzene, Acetaldehyde & Hydrogen Sulphide.

Under HACCP principles, the quality of CO₂ used at the point of carbonation is defined as a Critical Control Point (CCP) and the installation of PCO₂ system at this point will form part of a complete CO₂ quality approach.

Filtration Products for Brewing

Final Filtration

BEVPOR

Remove/reduce microorganisms and colloidal species; low adsorption of protein, colors, and flavors.

- 0.2µ and 0.45µ PES membrane
- Integrity tested
- Pre-flushed with pharma grade water
- Steam sterilizable

Clarification

PREPOR & PEPLYN

Graded density media combines high dirt-holding capacity with high flow rates.

- 0.6µ to 100µ
- Excellent particulate retention
- Pleated polypropylene or glass microfiber
- Available in large diameter format

Sterile Gas & Vent Filtration

TETPOR AIR & BIO-X

PTFE media for pre-filtration, sterilization, and bio-security.

- Removal ratings down to 0.01µ
- Fully validated and integrity tested
- Steam sterilizable to 142°C
- High Flow and High Temp options

Chlorine Reduction

CARBOFLOW

Activated carbon media adsorbs VOC's, chlorine, and odors.

- High efficiency & general grades
- 5" to 40" lengths
- FDA approved materials

Culinary Grade Steam

STEAM

Cleanable 316L ss cartridge.

- Sintered and pleated media
- 1µ to 25µ
[1µ meets 3A Standard 609-03]
- Exceptionally high flow rates
- Jumbo version for increased capacity

Water & General Fluid Polishing

DEPTH MEDIA & FILTER BAGS

Parker offers a broad array of products to remove particulates from virtually any fluid.

- **Melt blown Cartridges**
Absolute and nominal ratings
- **Wound Cartridges**
 - Cotton
 - Polypropylene
 - Nylon
 - Rayon
 - Polyester
- **Filter Bags**
 - Polyester
 - Polypropylene
 - Nylon

Liquid & Gas

FILTER HOUSINGS

Parker dominick hunter have a range of single and multi-round cartridge housings, designed to Food & Beverage Industry standards; based on ASME code. Housings are available in both standard and plus versions to suit individual application requirements.

- 316L ss
- Multi-element liquid housings 3 to 30 round
- Temperature, Pressure and Surface Finish options to suit most application requirements

Integrity Test Equipment

LIQUID & GAS

A full range of instruments specifically designed for the Food & Beverage Industry.

- VALAIRDATA II
Aerosol challenge test of sterile gas filters
- BEVCHECK
Handheld unit tests pressure decay of membrane filters
- BEVCHECK PLUS
Includes built-in printer

Additional system components available through other Parker Divisions

OIL-X EVOLUTION

Compressed air filters

PNEUDRI

Desiccant dryers

ES2000 SERIES

Oil / water separators

HYPERCHILL

Precision chilled water

ANALYTICAL GAS GENERATORS

Laboratory Gas

MIDIGAS & MAXIGAS

Nitrogen gas generators

WS WATER SEPARATORS

Bulk liquid removal

PCO2

Carbon dioxide polishing systems
